

# SHP2GML Suite

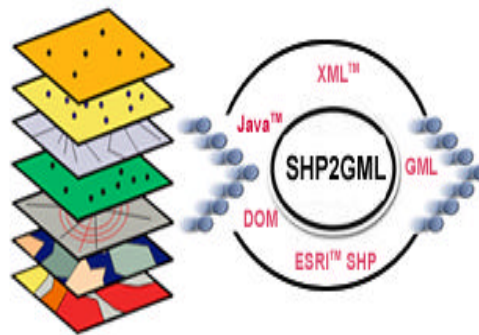

Pacific GeoTech Systems is a lead provider of conversion solutions, cost-effective systems and tools for delivering Geographic Information over the Internet. Based on its extensive expertise with XML/GML, Java, related web-based technologies and open-standard specifications, Pacific GeoTech Systems developed SHP2GML Suite, a complete solution for serving and validating geo-spatial data using smart XML-parsing.

The SHP2GML Suite addresses the growing need for geo-spatial exchange and standardized Geographic Information and services between government and the private sector. Pacific GeoTech developed:

- SHP2GML GeoBroker
- SHP2GML Desktop
- SHP2GML Java Library (Geo4J)

**SHP2GML GeoBroker** delivers fast Geographic Information over the Internet. The web-enabled application translates geo-spatial ESRI SHAPE format TO and FROM Geographic Markup Language (GML) format.

**SHP2GML Desktop** is a complete desktop application used for both translating and validating ESRI SHAPE format TO and FROM Geographic Markup Language (GML) format.

**SHP2GML Java Library (Geo4J)** is a complete Java Library that enables integration with third party applications. ESRI's format is already supported. Integration with other data viewers or mapping servers will be soon available. The Library includes all the files you need to redistribute Geo4J with your application(s).

The **SHP2GML Suite** is available in several configurations to meet specific needs. Visit our online demo at [www.pacificgeotech.com/indexshp2gml.htm](http://www.pacificgeotech.com/indexshp2gml.htm) which allows you to electronically submit any ESRI SHAPE format file and view the GML file online. Based on Geo4J java libraries, SHP2GML GeoBroker provides all the needed functionality for translating, validating and exchanging geo-spatial information online.

In addition, SHP2GML Suite provides full integration with **mapCONNECT** framework for rapid development and deployment of web-based applications.

We offers a variety of ways to purchase our products. Please contact us if you require a SHP2GML Suite evaluation CD. For more information visit our web site at [www.pacificgeotech.com/indexproducts.htm](http://www.pacificgeotech.com/indexproducts.htm).
